

Seminal Readings in MIS (April 2019)

Instructor: Professor Saonee Sarker, University of Virginia, USA

Proposed Seminar for Doctoral and Masters Students in MIS

Course Objectives

This is an *introductory seminar* on information systems (IS) research, focusing on managerial/behavioral/organizational issues in the field. The goals of this seminar are as follows:

- Help you to gain an understanding of what constitutes research (IS research in particular).
- Familiarize you with some of the issues being faced by the IS research discipline.
- Expose you to past and current research streams in the IS field.
- Provide you with an in-depth knowledge of the primary theoretical perspectives within the IS discipline.
- Help you to develop the skills to critically read and evaluate IS literature.
- Familiarize you with some of the work of a diverse set of researchers in the IS field.
